

Curtin University

Sustainable Mining and the Role of the Mining Industry

Dr Hyongdoo Tom Jang

The 44th AKBC-KABC
September 2023

Curtin University

'Make Tomorrow Better'

- The top one per cent of universities worldwide.
- Operating out of 5 countries with 9 unique campus locations
- Campuses in Australia, Malaysia, Singapore, Dubai, Mauritius
- 58,000+ students

Western Australian School of Mines

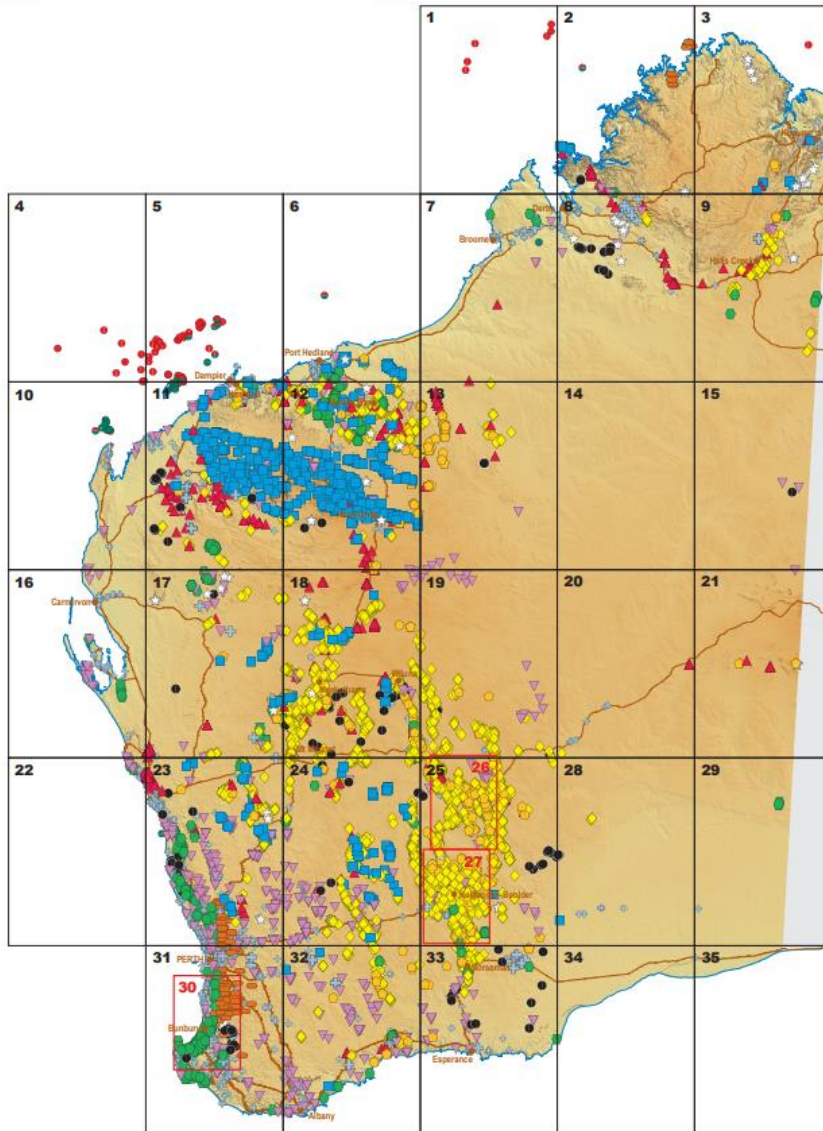

‘Da Dextram Comitibus’

- Erected for **International mining and industrial exhibition** in 1899 and founded in **1902** in Coolgardie. In 1969, becomes a branch of Curtin University
- Celebrate 120 years of WASM in August 2023

WASM, Curtin University has been ranked **the world's 2nd Mining school** since 2017. (Seven straight years)
QS World University Rankings by Subject of Mineral & Mining Engineering

Western Australia

Abundant and diverse minerals

- 50+ different minerals
- 500+ commercial projects
- 1,000+ operating mine sites

Innovative technology

- A leader in autonomous mining
- Integrated mining systems

Environmental and ethical standards

- The leading edge of sustainable mining
- Environmental accountability
- Social responsibility

Battery Minerals

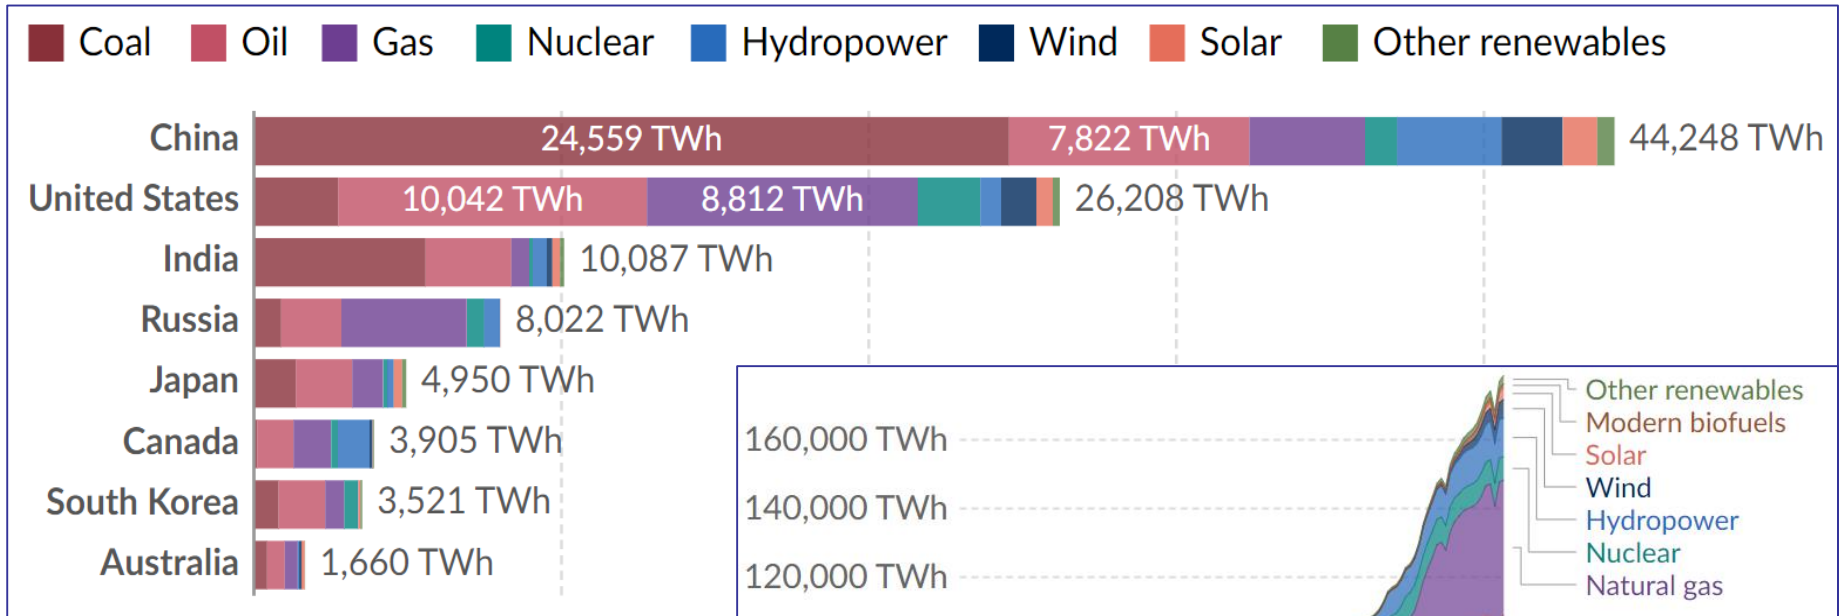

lithium, nickel, cobalt, manganese, aluminium, vanadium, rare earth metals, and reserves of untapped, high-quality graphite

Sustainable Mining

Sustainable development means – “Meets the needs of the present without compromising the ability of future generations to meet their own needs”.

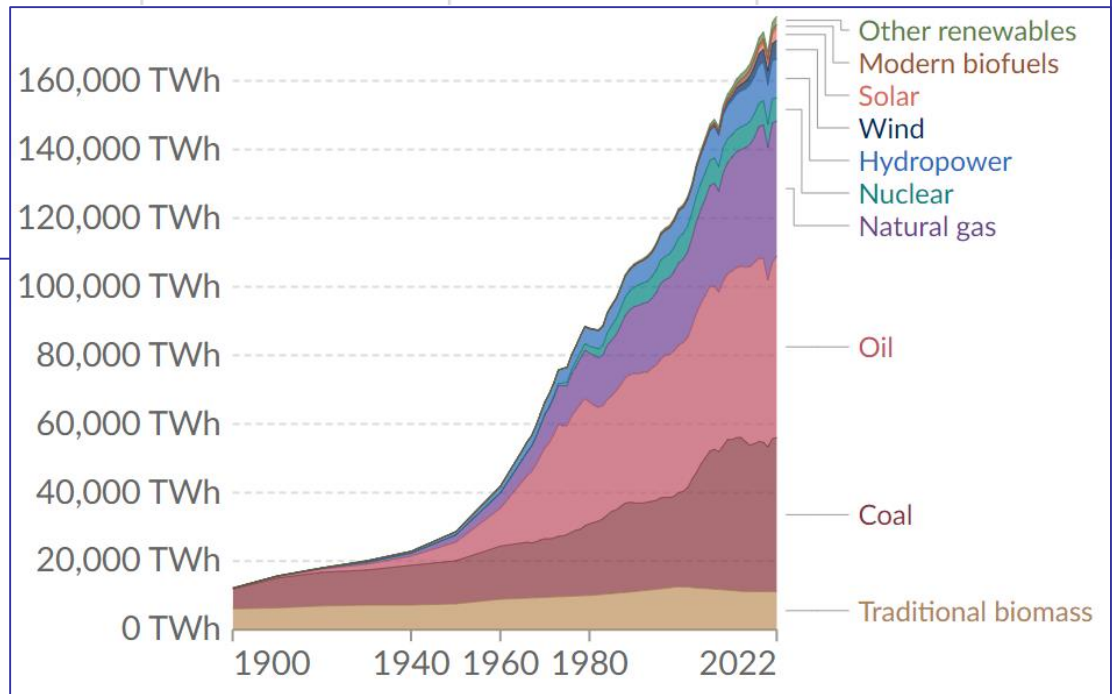

(Brundtland 1987)

Primary energy consumption trends

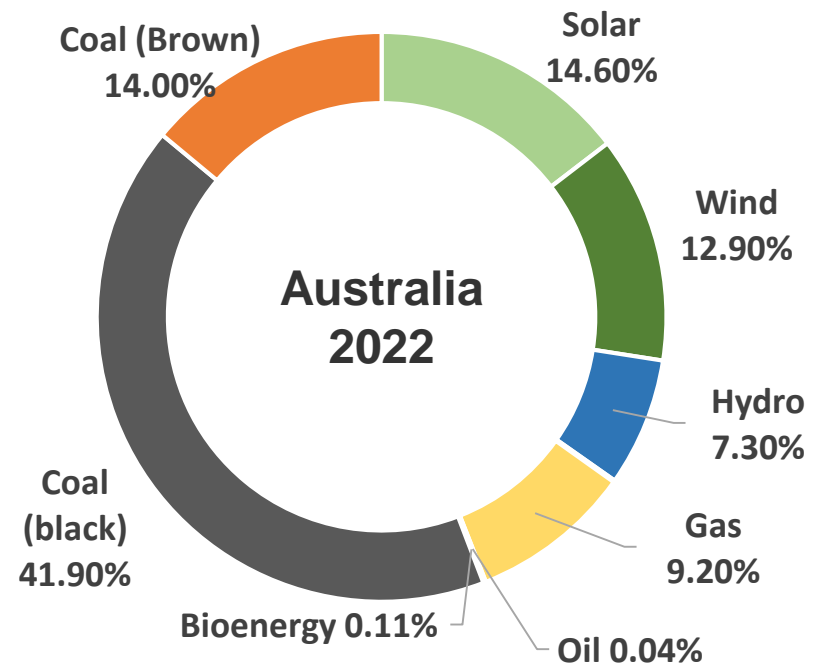

Global primary energy consumption by source – country in 2022

Global primary energy consumption by source – years

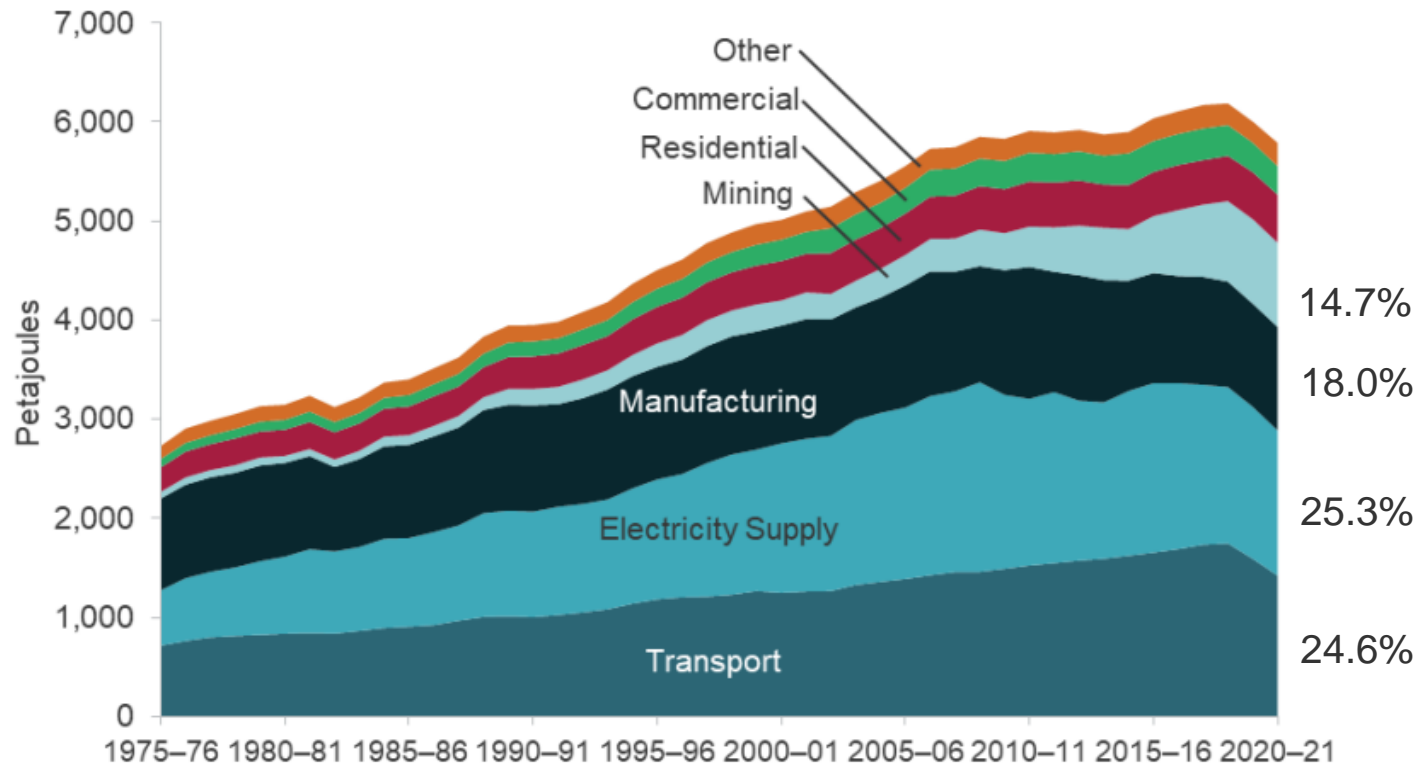

Energy Consumption of Australia

Total energy consumption by fuel type

Energy Consumption of Australia

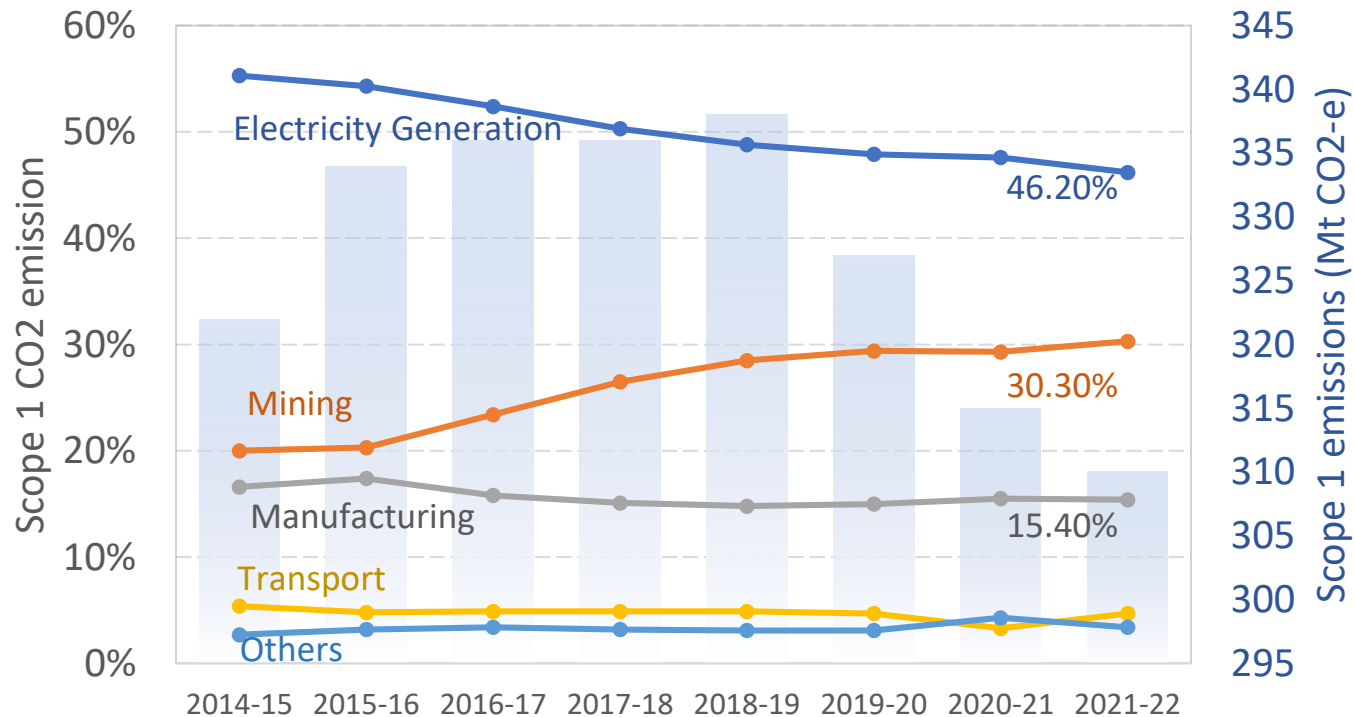

Total energy consumption by sector

- Mining energy use increased in 2019–20, supported by LNG and iron ore export growth

CO2-e emissions in Australia

Reported scope 1 emissions by industry

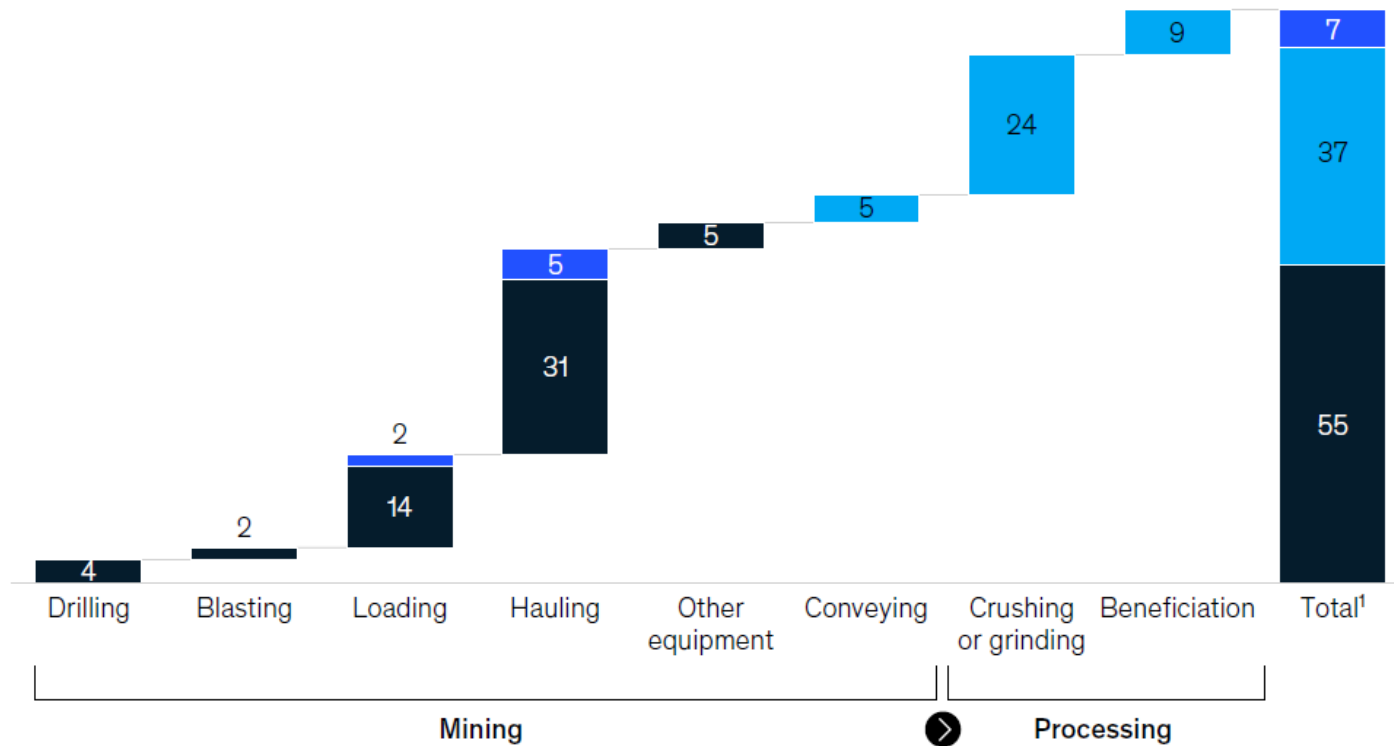

- SC1-CO2-e: 310 million tonnes - around 5% decrease since 2020-21
- Decrease the electricity sector. The mining sector still stays around 30%.

Breakdown of current CO2-2 emissions in Mining

Example, %: Iron ore; open pit; Australia; Run of mine: 25 Mt per annum

■ Diesel ■ Electricity ■ Other

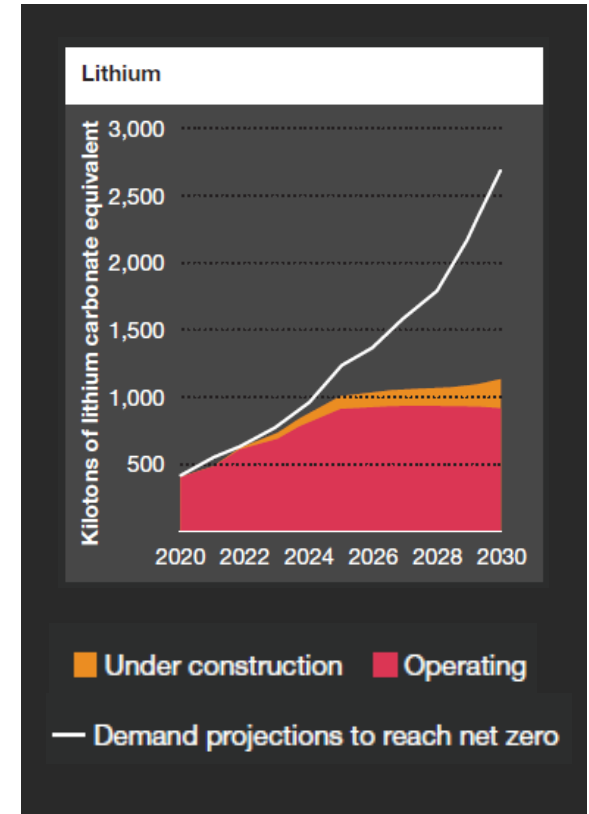

- The mining industry contributes 2 to 3 per cent of global CO2 emissions.
- Scope 1 emissions from diesel: 40 to 50%
- Scope 2 emissions from electricity generation: 30 to 35%

Supply demanded metals for Net-zero and Energy Transition

Global market value for coal vs. energy transition minerals

■ Thermal coal ■ Other critical minerals ■ Graphite ■ Cobalt ■ Nickel ■ Lithium ■ Copper

■ Under construction ■ Operating
— Demand projections to reach net zero

Roll of the mining industry in climate change

The world will be able to meet its net-zero targets **only if** the mining industry can substantially ramp up production.

Carbone-zero mining

Direct reduction of
CO₂-e emissions

Climate change
target

Met production targets
of critical minerals

¹ The United Nations Framework Convention on Climate Change or Paris Agreement requires signatories to pursue efforts to limit the global average temperature increase to 1.5°C above preindustrial levels.

Australia – Korea Smart Mining Education Consortium (AKMC)

To enhance the development of **human resources** in the field of mining and resources engineering in Korea, producing **globally competitive experts** who are in demand by industry, government, and academia in both Korea and Australia.

Australia – Korea Smart Mining Education Consortium (AKMC)

Minerals production, 2021

KOREA

Energy consumption, 2022

AUSTRALIA

- Educationally prepared students with degrees
- Lack of opportunity for work-integrated learning

- Lack of engineers
- Opportunities to work at the world-leading and innovative mining systems

AKMC – Activities

Short-term internship program

**Industry internship program
(vacation & graduate program)**

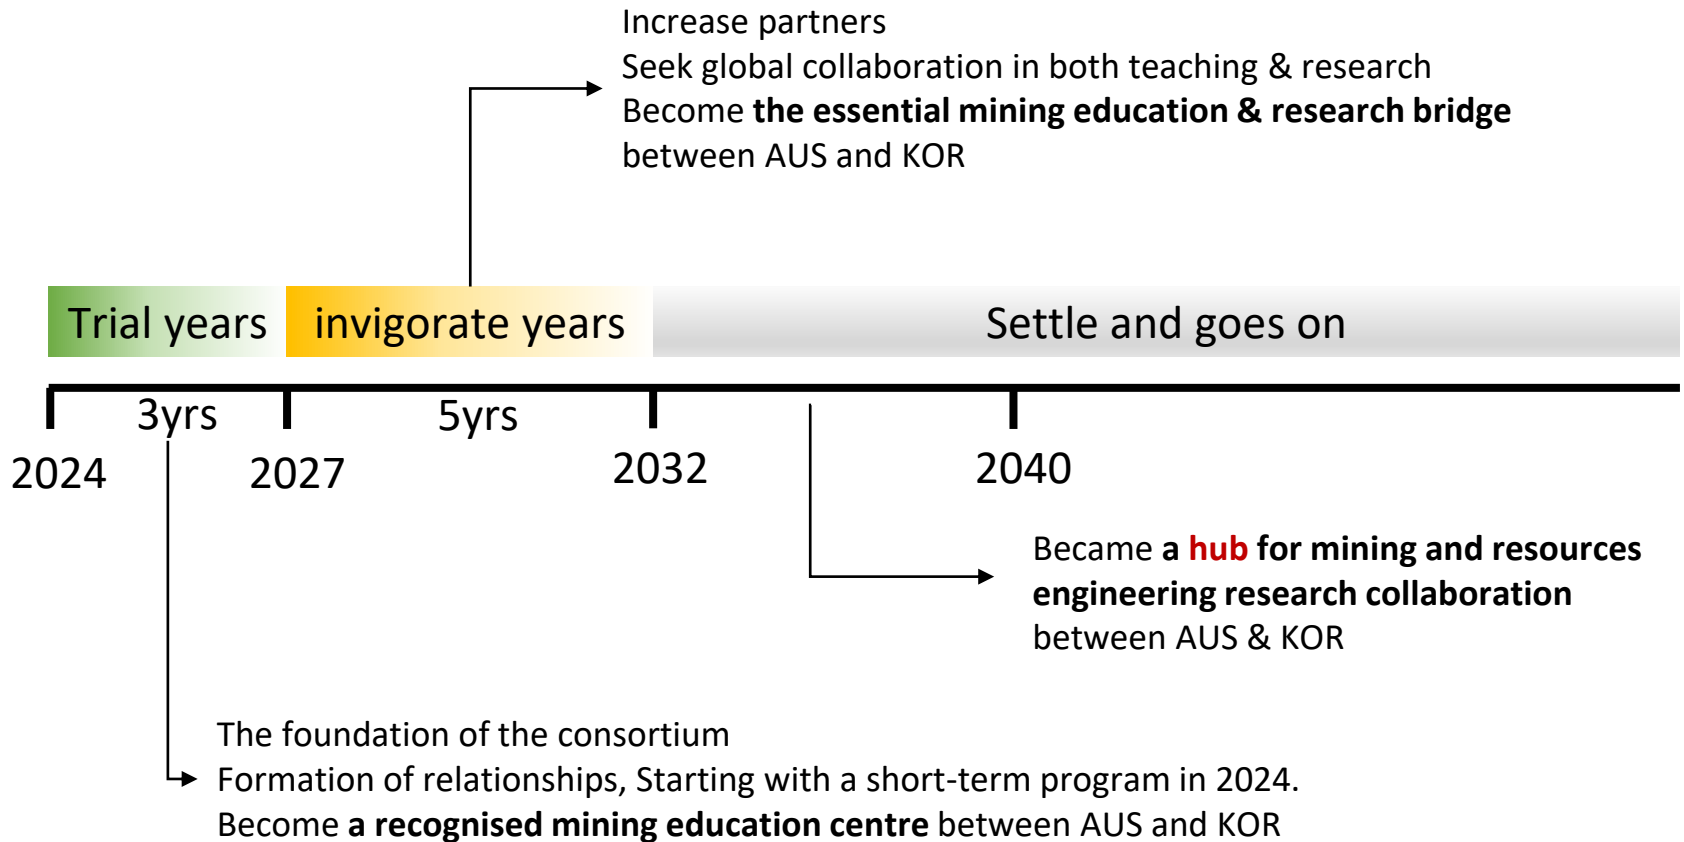

**Dual degree and credit exchange
program**

Promoting forum/conference

**Promoting research collaboration
between Australia and Korea**

Horizons of AKMC

AKMC - Collaborations

Collaboration with the major universities in Korea and industry partners.

Australia – Korea Smart Mining Consortium

Primary partners

Cooperative partners

Thank you

Super-pit, KCGM, Kalgoorlie Australia
